

## Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact [support@jstor.org](mailto:support@jstor.org).

IV. *An Extract of a Letter from the late Mr. Edw. Lhwyd to Dr. Tancred Robinson; giving an Account of some uncommon Plants growing about Pensans and St. Ives in Cornwall.*

*Pensans, Sept. 22. 1700.*

S I R,

I Have met with no Birds or Fish, since our coming hither, that I suspect for undescrib'd: Only two or three *Stellæ*, and some other *Exanguia marina* have occur'd, which I have not seen before on our *British* Coasts.

We have also met with the *Capillus Veneris vernus* in abundance on the Sea Cliffs about *St. Ives*. 2. Dr. Sheerard's *Scrophularia Scorodonia folio*. 3. *Blattaria lutea*; an *lutea minor* Park? But the Leaves of ours are not jagged: Also all the Plants mentioned by Mr Ray to grow here; excepting the *Gnaphalium marinum*, which should grow by this Town; and two or three more, which being at some distance, we have not looked for.

We have also found some *Fuæi*, which perhaps may be new: And I am told the Fishermen sometimes take up the *Corallina marina reticulata* by their Hooks; but I have not yet seen one of them.

E. LHWYD.
